

Certificate in Introduction to Play Therapy

In this module, learners can gain knowledge on how children learn about the world around them and how they interact with their environment through play. Aside from understanding what toys to choose and their uses in therapy work, you will also be equipped with foundation knowledge on Child-centred Play Therapy and learn how to create therapeutic environments for children to safely express themselves. The language of play is a powerful therapeutic medium to help adults understand children and how they make sense of the world.
